

## Wedge clamps

### Item description/product images

### Description

#### Material:

Channel aluminium profile.  
Wedge hardened steel.

#### Version:

Channel anodized.  
Wedge black oxidised.

#### Note:

Two workpieces can be held simultaneously with the wedge clamp. They are ideal for clamping round or rectangular pieces. The compact design allows space-saving series clamping.

#### Drawing reference:

In clamped position dimension B1 max. given in the table should be achieved.
